

Roberta just got a great deal by ordering the Super Jumbo Colossal box of pens.

Unfortunately, so did Chris, Mike, Jill, Ron, Kevin, Jeff, Brad, Susan, Patrick, Jennifer and Amanda.

There's a simple way to lower the cost of office supplies.

Order less.

Supply Chain Management for the Office

You've already negotiated the lowest prices on your office supplies.

Your employees may even be ordering on their own by catalog or online.

Then why are you still missing savings of 20% or more?

There's a little secret that your current office supply company would prefer that you didn't know.

Low prices alone won't save you money--not if you're ordering too much. That's because it's not just about low prices. It's about your inventory.

When an employee needs a pen, he doesn't order just one from the catalog, web or stock room...he orders a whole box. And if the rest of the office is doing the same thing--well, your inventory is creeping up--and that's costing you money.

These are just three more of the many hidden costs you may be overlooking:

1. Overordering

Kyle got a bargain on glow-in-the-dark sticky notes and a lot of other stuff he doesn't need.

2. Searching and stockpiling

Sara searched the office for red markers because the stockroom is out. She stockpiles them in her desk

3. Costly small deliveries

Oops. Patrick forgot the presentation folders--another small delivery--and added cost

We're a different kind of supply company. We don't want you to order more. We want you to consume less.

Most supply companies want you to order, order, order. Because the more your order, the more they make.

But we take a totally different perspective. We look at the big picture – your total savings.

Our SmartSupply SystemSM can save you 20% or more.

Here's how it works:

- We start by studying the total pattern of your supply usage: ordering, consumption, and all associated costs.
- We develop a critical list of supplies that must always be there. And then we locate them within 100 feet of designated work areas in our compact Smart SupplySM Cabinet. Orders arrive in 24 hours.
- But we're not done yet. We continually track your usage and adjust your inventory so that we replenish only the amount you need with just-in-time ordering.
- And you always know what's going on. Our reports tell you how much you're consuming, what it's costing, and how to further improve efficiency.

It's simple. You order less, so you save money. Employees waste less time. You gain control of the process.

We'd like to prove it to you. So, we'll give you \$100 in office supplies if we can't show you how to save 20% on the total cost of your supplies.

Please call us today for a free Supply Analysis consultation.

Brent Neilson at **800.445.5236**

"No more compulsive browsing for me. And I save a lot of time now not doing my own ordering."

"I've kicked my hoarding habit. I know the red markers will be there when I need them."

"Now I'm guilt-free. When I forget something I need-- I just go the the SmartSupplySM Cabinet and get it, instead of having to place another order."

Save 20% on the total cost of your office supplies.
